Mysteries of the Unseen World

Museum Educator Guide

For the complete educator guide with media resources, visit: http://nationalgeographic.org/media/mysteries-unseen-world-museum-educator-guide/

This guide is designed to provide museum educators with resources to promote and help augment guest experiences before and after viewing the film Mysteries of the Unseen World. Inside the guide you will find informational text about the film, text to include in newsletters for event promotion, and a suite of activities to use with visiting groups of children and students. Activities vary from those that last 5 minutes to those designed to be used during an overnight, day camp, or other extended experience.

See a variety of education resources to accompany the film at the Mysteries of the Unseen World Education collection.

About the Film

Mysteries of the Unseen World transports audiences to places on this planet they have never been before, to see things that are beyond their normal vision, yet are literally right in front of their eyes.

High-speed and time-lapse photography, electron microscopy, and nanotechnology are just a few of the advancements in science that allow us to see
a whole new universe of things, events, creatures, and processes we never knew existed. These technologies now give us “super powers” to see beyond what is in front of us.

Visually stunning and rooted in cutting-edge research, *Mysteries of the Unseen World* will enthrall audiences as they begin to understand the enormity of the world they can’t see, a world that exists in the air they breathe, on their own bodies, and in all of the events that occur around them minute-by-minute—and nanosecond-by-nanosecond. With this understanding comes a new appreciation of the wonder and possibilities of science.
