Young Voices for the Planet is a film series featuring young people who are making a difference! They are shrinking the carbon footprint of their homes, schools and communities. You, too, can do something about global warming! As Alec Looz says, "Kids Have Power."

Visit [Young Voices for the Planet](http://www.nationalgeographic.org/media/young-voices-climate-change/) to learn more about what regular kids have done to make a difference in their communities. Each film featured on the Young Voices for the Planet website includes curriculum to aid in teaching students about the planet, climate change, and the power they have to make an impact.
