Extending the Learning: Social Networking Survey

Poll some of your peers to find out how many of them use social networking sites like these. Put a check mark if they use the site occasionally and a + if they use it daily.

Peer	1	2	3	4	5	6	7	8	9	10	11
Facebook or Google+											
Twitter											
Instagram, Vine or other photo/video sharing platform											
Skype or other instant messaging service											
Cellphone (texting or email)											
Games: any browser-based game with chat											

Ask the people you poll if they have experienced or know someone who experienced a problem or danger from online communications. Take notes (without names) of any stories you gather.

Create a visual representation (for example, a graph, pie chart, or pictograph) to illustrate your findings. Be prepared to share some of the Internet dangers you learned about during your survey.
