

Name _____ Date _____

Decision Statement Planner

Part 1. Stakeholders

First, list each stakeholder you identified and rate their level of influence on a scale of one (1) to three (3):

3 = the stakeholder with the highest level of influence in the decision

1 = the stakeholder with the lowest level of influence in the decision

Then provide your reasoning for each of the stakeholder ratings.

Stakeholders	Level of Influence	Reasoning

Part 2. Measures

First summarize the effects of each measure on stakeholders. Then, rank the measures in order of importance. Include a rationale for your choice.

Measure	Effects on Stakeholders	Importance	Rationale
Increase United States production of oil			
Increase use of alternatives sources for electricity, particularly coal and nuclear energy			
Impose efficiency standards for automobiles and appliances			
Impose efficiency standards for industries that are the largest energy consumers			
Impose energy conservation requirements for federal buildings			
Deregulate domestic oil prices			
Apply import fees to foreign oil imports			
Create a United States oil reserve			
Create an agency to deal with energy emergencies			
Disallow export of domestic oil

Part 3. Your Recommendation

Imagine you are an advisor to President Ford on the Energy Policy and Conservation Act of 1975. Which measure would you advise him to advocate most strongly? Consider political, geographic, economic, and environmental factors in making your decision. Write a recommendation that includes an analysis of three measures and your decision statement about which measure he should advocate for. Include:

An analysis of three measures, including:

- a brief description of the measure
- a list of the pros and cons of the measure
- a list of reasons to advocate for the measure and reasons not to

Your decision statement, including:

- which measure is the most important to advocate for
- the rationale for your decision, citing evidence from articles, maps, and other resources you have investigated
- a statement of how each stakeholder would be affected by the measure
