A River's Role in the History of Europe

Revisit the river you were assigned for the worksheet Mapping Drainage Basins and Rivers. Write 1-2 paragraphs in which you imagine the role of this river in Europe's history. Make sure your paragraphs answer the following questions:

- What countries did the river connect?
- Based on how the river flows through and between these countries, do you think the river was a source of cooperation or conflict? Why?
- Based on the Natural Vegetation of Europe map, what kind of land surrounded the river in the past?
- Based on the readings from Lesson 3, Activity 1 and this activity, how has that land changed as more people settled in Europe?

[illegible]
