Multimedia Presentation Guidelines

Follow the guidelines below as you create a multimedia presentation on an energy resource.

Guidelines

Your presentation must focus on an energy resource and one or two specific locations where that energy resource is used. Sources used must be cited.

Your presentation must include the following sections:

1. How electricity is generated from the energy resource
 - ☐ This section must include one or more student-created graphics.
2. The geography of the location(s)
 - ☐ This section must include one or more maps.
3. Benefits and drawbacks of the energy resource
 - ☐ This section must include at least three benefits and three drawbacks.
 - ☐ This section must include both text and audio.
4. Environmental impacts of the energy resource
 - ☐ This section must include one or more environmental impacts occurring in the location(s).
