Marine Ecosystem Critical Issues: Case Studies

You will analyze case studies for two different marine protected areas. Use the charts below to record your observations and summarize the important components of each case study.

Case Study #1: Apo Island, Philippines

Geographic location	
Marine ecosystem or habitat types	
Important marine species	
Human uses	
Human impacts/ threats	
Goals of the MPA	
Stakeholders affected by the MPA	
Outcomes (positive results) from creating the MPA

Marine Ecosystem Critical Issues: Case Studies, continued

Case Study #2: Galápagos Marine Reserve, Ecuador

Geographic location	
Marine ecosystem or habitat types	
Important marine species	
Human uses	
Human impacts/ threats	
Goals of the MPA	
Stakeholders affected by the MPA	
Outcomes (positive results) from creating the MPA
