

PSA Presentation: Audience Feedback

Name

Date

*As an audience member, you have an important task.
Please give the presenting students the gift of your thoughtful feedback.*

The public service announcements (PSAs) were required to include the following:

- Introduction to the microbe and biological information
- Impacts on the body system
- Public health information
- Other uses or applications of the microbe
- An evidence-based claim about the value of eradicating the microbe

1. What did the group do successfully? What were some strengths of the PSA?

2. What is one way the group could improve their PSA?

3. Evaluate the group's eradication claim:

- How did their claim show their understanding of the body as a complex system?
- Was the claim supported by sufficient and reliable evidence? Explain.
- Was the evidence connected to their claim by sensible reasoning? Explain.
- If another group also presented on the same microbe, compare their claims. How did the two groups emphasize similar or different evidence and/or interpretations of facts?

4. What is one new idea you learned from this group?

5. Any other feedback you would like to give to this group?
