Stakeholder Analysis Rubric

Use this rubric to evaluate the research process, problem summary, and final list of stakeholder questions generated by a group.

Criteria	Developing	Approaching	Meets
Initial research questions accurately reflect stakeholder's concerns.	Initial research questions are too general and do not reflect concerns specific to the stakeholder.	Initial research questions reflect some, but not all, of the stakeholder's major concerns.	Initial research questions reflect all of the stakeholder's major concerns.
Research meaningfully addresses questions posed by the group.	Research is too general and does not specifically address the most significant research questions.	Research addresses some of the most significant research questions posed by the group.	Research addresses all of the most significant research questions posed by the group.
Stakeholder questions on the final list further knowledge that the stakeholder would need to make an informed decision.	The stakeholder questions on the final list are too general and would not provide information needed to make a decision.	Some of the stakeholder questions on the final list would provide information needed to make a decision.	All of the stakeholder questions on the final list would provide information needed to make a decision.
Problem summary addresses the primary causes of the blackouts and brownouts.	The problem summary does not address the primary causes of the blackouts and brownouts.	The problem summary addresses only some of the primary causes of the blackouts and brownouts.	The problem summary fully addresses the primary causes of the blackouts and brownouts.
Problem summary addresses the specific effects of blackouts and brownouts on the stakeholder.	The problem summary does not address the effects of the blackouts and brownouts.	The problem summary addresses general effects of the blackouts and brownouts but does not address effects specific to the stakeholder.	The problem summary fully addresses the specific effects of blackouts and brownouts on the stakeholder.
