

Name _____ Date _____

Decision Statement

Part 1. Stakeholders

Rate each stakeholder on a scale of one to three.

1 = the stakeholder with the lowest level of influence in the decision

2 = the stakeholder with an average level of influence in the decision

3 = the stakeholder with the highest level of influence in the decision

Provide reasoning for each of the stakeholder ratings.

Stakeholders	Level of Influence	Reasoning
First Nations coastal communities (Gitga'at or Haisla)		
Terrestrial ecosystem (Great Bear Rainforest)		
Marine ecosystem		
Wildlife (Kermode, or white spirit, bear, salmon, grey wolf)		
Oil and gas company

Part 2. Consequences

What are the consequences these stakeholders would experience if the oil pipeline is constructed? Place an X in the section you think the stakeholder belongs in (most affected or least affected). Identify the consequence from your consequence web that is connected to each of these stakeholders.

Stakeholders	Most Affected	Least Affected	Connection to a Consequence
First Nations coastal communities (Gitga'at or Haisla)			
Terrestrial ecosystem (Great Bear Rainforest)			
Marine ecosystem

Part 3. Decision Statement

Write a final decision statement, considering all stakeholders' perspectives. The decision statement should include the following:

- Whether you would support the construction of the oil pipeline
- Rationale for your decision, citing evidence from articles, video clips, and maps you have investigated
- A statement of who would positively and negatively benefit from the decision
