

# Action Plan Research

Group Members \_\_\_\_\_

Directions: Use this table to collect information about different kinds of policies and practices that can help prevent the spread of disease. As you learn about each method of containment, think about how it would work if implemented in response to an outbreak of your selected disease.

Name of Disease: \_\_\_\_\_

Containment method	Definition	Proactive/ reactive?	Role of government (policies, rules, people)	Role of individuals and groups in the community (people, organizations, agencies)	Will this effectively contain my disease (y/n)?	Is it realistic? Why or why not?	Include in Action Plan (y/n)?
Medical Treatment	<i>Administering medicine such as antibiotics to treat an infection</i>	<i>Reactive</i>	<i>Federal authorities (FDA) regulates the pharmaceutical industry</i>	<i>Doctors may need to prescribe medicine. Community clinics can administer medicine.</i>
