Stakeholder Chart

Part 1. Use this chart to take notes as you read the case study and as you continue to research the Cape Wind project.

Stakeholder: _____

List ways in which the stakeholder will be affected.	Is it a positive or negative effect?	Is this effect the intended goal of the action or is it a side effect?	Has the stakeholder placed himself or herself in this position voluntarily and with appropriate understanding of the risks involved?	If the effect is negative, do you feel it is directly offset by greater good elsewhere? Explain.
