

Name _____ Date _____

Species that Migrate

Four species' migratory habits are described in the series *Great Migrations*. Use the show and the National Geographic Animals website to find out more about these animals. The first one has been done for you.

Animal	Size	Habitat	Geographic Range	Life Span (in the wild)	Distance Traveled	Time of Migration	Type of Migration	Description
Sockeye salmon	Up to 33 inches; 5-15 lbs.	Oceans, rivers	Pacific Ocean, Alaska, western Canada, western U.S., eastern Russia	3-5 years	Thousands of miles	Summer or fall	Reproductive	Hatch in freshwater, remain up to 3 years before traveling to sea. Grow rapidly in salt water, remaining for 1-4 years before swimming back upriver to spawn.
Monarch butterfly								
Wildebeest								
Sperm whale								
Red crab
