In This Guide

In this guide, you will find language arts, science, and social studies lessons for the articles in this issue of Young Explorer Scout.

Young Explorer Magazine

Young Explorer classroom magazines for kindergarten and grade 1 develop young readers’ literacy skills through engaging informational text. Great storytelling and stunning photographs teach students about our planet and the people, plants, and animals that live on it. Encourage your students to read and explore our world with Young Explorer magazines.

Scout

The Scout edition is written for kindergarten students. Some articles with characteristics of emergent text will be easier for students to read. You may find that other articles are better suited for teacher read-alouds.

Visit Young Explorer’s website, NatGeo.org/explorermag-resources, to find additional resources for extending your students’ learning.
Explore with Me

Objective
- Students will name the author and tell what his role is in presenting the information in the text.
- Students will understand and use the pronoun we.
- Students will ask and answer questions about key details in the text.

Resources
- Language Arts Master [page 4]

Summary
Explorer Steve Boyes invites readers to come with him and his team to see what they do when they explore.

BUILD VOCABULARY AND CONCEPTS
- explore
- team
- plan
- map

The words above are used in the article and may be new to students. Use the following routine to introduce the words to students. Go through the routine, one word at a time. Pronounce the word. Ask students if they know the word. They can respond with a thumbs up or a thumbs down. Define each word, using student-friendly language. Post the word on a word wall. Tell students they will be adding more information about each word, such as drawings, photos, descriptions, and definitions, as they learn more. After reading, as a class, you may want to add information about each word to the word wall.

Encourage students to tell what they know about the words and to use the words as they talk about their own experiences and the article.

WORD WORK
Sight Words: my, is, come, with, me, and, my, see, we, do, make, a, look, at, in, the, go, to, new, this, down

READ AND DISCUSS
Read the article “Explore with Me” aloud to students as they follow along. You may want to read the entire article first, and then reread the article, taking time to stop and discuss each two-page spread.

Pages 2–3 Read the title and the byline aloud to students. Ask: Who wrote the article “Explore with Me”? (Steve Boyes) What word lets us know he wrote the article? (by) Show students the picture of Steve Boyes on page 3. Then read the text on page 2. Ask: What did we find out about Steve Boyes? (Steve and his team explore.) What do you think we will learn as we read on in the article? (what Steve and his team do when they explore)

Pages 4–5 Read pages 4 and 5. Ask: In the article, who is “we”? (“We” is Steve Boyes and his team.) Ask students to tell what Steve and his team do, using the pictures to help them retell what they learned.

Pages 6–7 Ask: What is a new place Steve and his team go to? (a wetland) What do they see there? (animals) Ask students if they know what kind of animals are shown in the pictures on page 7. If they don’t know, tell them the small picture is of hippopotamuses, and the big picture is of lions.

Pages 8–9 Ask: What do Steve and his team do when they explore? (learn new things; write down what they learn; share what they learn) Ask students to use the pictures to tell what each picture shows and how it relates to the text.

TALK AND WRITE
Students can respond to the article by talking and writing. Use the following prompts to guide them. You might also want to use the Language Arts Master for this article.

- Talk about something new you learned about exploring.
- Draw one thing Steve and his team do.
Biologist and conservationist Steve Boyes has been exploring the Okavango Delta for many years. The delta is one of few inland deltas that do not flow into a sea or ocean. It is home to some of the world’s most endangered species. Each year Boyes leads a team across a different section of the delta to gather data with scientists, photographers, and guides. The research Boyes does has helped protect the Okavango Delta. Still, the Okavango Delta remains at risk from various threats, such as proposed dams and slash-and-burn agriculture. Steve continues to explore the Okavango Delta in an effort to protect and save this glorious wetland wilderness—one of the last remaining in Africa.

**EXPLORE**

Show students on a world map where the United States is and where they live in the United States. Then point out where Africa is. Next find where the Okavango Delta is in Botswana. Let students know that explorer Steve Boyes explores this area of the world. Explain that he wants to help save and protect it.

**EXPLAIN**

Read the article to students.

After reading, have students explain and describe what Steve and his team do before they start exploring.

They make a plan.
They look at maps.
They pack what they need in bags.
They pack the bags in boats.

Have students explain what a wetland is, using the pictures on pages 6 and 7 to help them. Students should mention that a wetland has water. Ask: *Why did Steve and his team need boats to explore?* *(The wetland has water, and they needed boats to travel in the wetland.)*

Ask: *What do explorers like Steve and his team do?* *(They learn new things and write them down.) Why do you think they share what they learn?* *(so others can learn, too)*

**ELABORATE**

Have students become explorers. Find a place to explore in the classroom, school, or even outside. With students, make a plan and gather the things you’ll need. Together, write down or draw what you see. After exploring, discuss what you learned and why it’s fun to explore.

**EVALUATE**

Assess students’ understanding with the Science Master for this article. You might also use the following prompts.

- What does an explorer do?
- Draw the place where Steve and his team explore.
Help the team get ready to explore.

Fill in the missing letters to complete the words.

Then match the words to the pictures.

___ ap

___ ags

___ oats
Draw the wetland.
Food for Fido

LANGUAGE ARTS

Objective
• Students will recognize and use rhyming words.

Resources
• Language Arts Master (page 8)

Summary
Meg needs food for Fido. She needs a map to find the pet store. Students can use the map to help Meg find the pet store.

READ AND DISCUSS
Read the article “Food for Fido” aloud to students as they follow along. You may want to read the entire article first, and then reread the article, taking time to stop and discuss each two-page spread.

Pages 10–11 Read the poem aloud to students. After reading the poem say: Let’s talk about what the poem tells us about maps. Let’s see if we can figure out some things.

• What do maps show? (places we may go)
• What do maps help us find? (streets and roads)
• What else do maps show? (north, south, east, and west)

Point to the compass rose on page 10. Explain to students that the letters on a compass rose stand for north, south, east, and west. Tell them these are called directions.

Read the title of the article and the text on page 11. Ask: What is a map? (a drawing of a place) Why does Meg need a map? (She wants to find a pet store to get food for Fido.)

Pages 12–13 After reading the text on pages 12 and 13, have students look at the map. Say: Look at the map key. What do the symbols on the map key show? (drawings of things on the map) Then ask students to find the fire station, the gas station, and the pet store on the map. Ask: Where does Meg need to go? (the pet store)

Pages 14–15 Read the first two lines of text on page 14. Then work through the numbered steps with students to use the map to help Meg find her way from her house to the pet store.

TALK AND WRITE
Students can respond to the article by talking and writing. Use the following prompts to guide them. You might also want to use the Language Arts Master for this article.

• Talk about something new you learned about maps.
• What can you find on a map?
**Food for Fido**

**SOCIAL STUDIES**

**Objective**
- Students will use a map and map key to locate places.

**Resources**
- Read a Map poster (Teacher’s Edition)
- Social Studies Master (page 9)

**Social Studies Background**
Maps are representations of places on Earth from a bird’s eye view. A bird’s eye view allows a map to show what things look like from above. Maps show a lot of information using symbols to represent things. The map key, or legend, explains what the different symbols mean. Some maps also include a compass rose to indicate where north, south, east and west are on the map.

National Geography Awareness Week is the week of November 13–19, 2016.

**ENGAGE**
Ask students if they know how to get from their house or apartment to school. Ask: Do you know some of the streets you go on? Do you know some of the places you pass by, such as stores or parks? Discuss with students what they have noticed on their way to and from school. Ask them to notice these things when they go to and from school over the next few days. Say: When we need to get to places we are unfamiliar with, a map can help us find our way.

**EXPLORE**
Explore what maps are. Show students different kinds of maps and explain what they show. Show flat maps of the world and compare them to a globe. Show maps of the United States, and point out the state you live in. See if some students have lived in other states or were perhaps born in a different state. See if they know states where relatives live. Then say: Maps can also show smaller areas, such as neighborhoods. Those kinds of maps can help us find things that are closer to us and that we could walk or drive to.

**EXPLAIN**
Read the article to students.

After reading, ask: What is a map? (a drawing of a place)
What kind of map did Meg need? (a map that could help her get from home to the pet store) Work with students to help them understand the different features on a map. Use the following prompts with students.

- Look at the map on pages 12 and 13. With a partner, point out the streets on the map. How do you know they are streets? (Students should point out Lake Street and Main Street on the map. They may say they know they are streets because they look like streets or roads.)
- With a partner, talk about the other things you see on the map. (Students should mention that they see the fire station, the pet store, and the gas station. They may also mention that they see trees and a car.)
- With a partner, point out the map key. How does the map key help us understand what is on the map? (The map key tells us what the symbols on the map mean.)
- Look at the map on pages 14 and 15. With a partner, talk about this map. How is it different from the map on pages 12 and 13? (It shows more streets.) Find the places that were also on pages 12 and 13. (fire station, pet store, gas station) Point out the new streets and places that are on this map. (Students should point out Pine Street, Hill Street, and the new places that are shown on the map key and where they are on the map.)

**ELABORATE**
Display the Read a Map poster. As a class, work through the numbered steps and questions at the bottom of the poster to find places on the map.

**EVALUATE**
Assess students’ understanding with the Social Studies Master for this article. You might also use the following prompts.

- What is a map?
- What part of the map tells you what the symbols mean?

**Internet Link**

LANGUAGE ARTS: Rhyme Time

Find the pet in the puzzle.
Color the puzzle pieces that rhyme with pet.
Use the symbols in the map key.

Draw a map of a park.

Bench
Path
Seesaw
Swings
Sand box
Slide
Tree

Map Key

Reindeer

Objective
• Students will describe and compare how the land and reindeer change with the seasons.

Resources
• Language Arts Master (page 12)

Summary
Reindeer live in the far north. When the seasons change, the land and the reindeer change, too.

WORD WORK
Sight Words: in, the, with, too, eat, must, find, a, is, are, they, help, for, brown, this, see, white, like, do

BUILD VOCABULARY AND CONCEPTS
• reindeer
• summer
• north
• winter
• seasons
• hoof/hooves

The words above are used in the article and may be new to students. Use the following routine to introduce the words to students. Go through the routine, one word at a time. Pronounce the word. Ask students if they know the word. They can respond with a thumbs up or a thumbs down. Define each word, using student-friendly language. Post the word on a word wall. Tell students they will be adding more information about each word, such as drawings, photos, descriptions, and definitions, as they learn more. After reading, as a class, you may want to add information about each word to a word wall.

Encourage students to tell what they know about the words and to use the words as they talk about their own experiences and the article.

READ AND DISCUSS
Read the article “Reindeer” aloud to students as they follow along. You may want to read the entire article first, and then reread the article, taking time to stop and discuss each two-page spread.

When you read and discuss the article, focus on these questions for each two-page spread.

Pages 16–17 Ask: Where do reindeer live? (in the far north) Look at the picture on pages 16 and 17. How would you describe the reindeer in this picture? [Students may say that the reindeer has white fur and antlers. They may describe his ears, nose, legs, and mouth.] What does the text tell us about the land and the reindeer? (that the land and reindeer change with the seasons) Ask: What questions do you have about how the land and the reindeer change with the seasons? Accept all questions and let students know that you will read on to find out if the text will answer their questions.

Pages 18–19 Ask: What do we find out on these pages about how the land and the reindeer change in summer and in winter? [Plants grow in summer, and in winter the snow covers the plants. In summer, the reindeer eat the plants. In winter, the reindeer must walk to find food.]

Pages 20–21 Ask: What do we find out on these pages about how the land and the reindeer change in summer and in winter? [In summer, the ground is wet. In winter, snow covers the ground. In summer the reindeer hooves are soft. In the winter their hooves are hard and sharp so they can dig in the snow for food.]

Pages 22–23 Ask: What do we find out on these pages about how the land and the reindeer change in summer and in winter? [In summer, some land is brown. In winter, the land is white. In summer, the reindeer fur is brown, too. In winter, reindeer grow white fur.]

Review with students the questions they had at the beginning of the article about how the land and reindeer change with the seasons. If all of their questions have not been answered, you may want to research them together to find the answers. Have students look back at the picture of the reindeer on pages 16 and 17. Ask: Does this picture show the reindeer in summer or in winter? (winter)

TALK AND WRITE
Students can respond to the article by talking and writing. Use the following prompts to guide them. You might also want to use the Language Arts Master for this article.

• Talk about something new you learned about reindeer.
• Tell how a reindeer changes with the seasons.
Reindeer

SCIENCE

Objective
- Students will learn how reindeer live in a place that has the things they need.

Resources
- Hello, Deer! poster (Teacher’s Edition)
- Science Master (page 13)

Science Background
Reindeer are a type of deer. They are found in the far northern parts of Asia, Europe, and North America. In North America, wild reindeer are called caribou. Reindeer adapt to the seasons. This allows them to survive the extremes of the northern climate. Unlike other deer, both male and female reindeer grow antlers. Each year the antlers fall off and grow back. Reindeer live in herds that range from small groups to larger groups of 1,000 or more. Reindeer migrate as the weather changes to search for food. Reindeer are excellent swimmers. Their life expectancy is up to 15 years in the wild.

ENGAGE
Engage students in a discussion about deer. Ask them if they have ever seen a deer. Ask: What does a deer look like? (Students should describe the type of deer they are familiar with.) Ask if students have ever heard of reindeer. If so, find out what they know about them.

EXPLORE
Before reading the article, explore with students on a world map where reindeer live. Reindeer are found in the far northern parts of North America, Greenland, and in northern Europe to east Asia.

EXPLAIN
Read the article to students.

After reading, have students explain and describe some things they learned from the article about reindeer and the land the reindeer live in. Students should note some of the following:

- Reindeer live in the far north.
- Both the reindeer and the land they live in change with the seasons.
- In summer, the land has plants that the reindeer eat. In winter, the land is covered in snow, and the reindeer have to walk to find food.
- When the ground is wet in the summer, the reindeer’s hooves are soft. This makes it easy for them to walk on the wet ground. In the winter, when the ground is hard, the reindeer’s hooves are hard and sharp. This helps the reindeer dig in the ground for food.
- In summer, the land is brown and reindeer fur is brown, too. In winter, the land is white and reindeer fur is white. This makes the reindeer harder to see.

ELABORATE
Have students look at More to Explore on the back page of the magazine. Read aloud “Did You Know?” You may want to go back into the article to look at the different pictures again and have students discuss the differences in the antlers on the reindeer in the pictures. You might also ask them to tell or show how the reindeer could use their antlers to dig for food.

Share the Hello, Deer! poster with students. Explain to students that there are many different animals that belong to the deer family. With students, look at all of the different deer on the poster and read each label to students as you look at the pictures. Ask: How are the deer alike and different? (Students should mention things such as many of the animals have antlers, all of them have 4 legs, and so on. Differences could include color, thickness and length of fur, and the shape and size of tails and ears.)

EVALUATE
Assess students’ understanding with the Science Master for this article. You might also use the following prompts.

- Where do reindeer live?
- How does the land in the far north change in the winter?
LANGUAGE ARTS: Summer and Winter

Draw the land and reindeer in summer.

Summer

Draw the land and reindeer in winter.

Winter
A reindeer’s parts help it live.

Fill in the missing letters to complete the words.
ANSWER KEY

Explore with Me
Language Arts: Get Ready to Explore, page 4
Students should fill in the missing letters to complete the words and match the words to the pictures.

map → image of map
bags → image of bags
boats → image of boats

Science: Explore the Wetland, page 5
Students should draw a wetland.

Food for Fido
Language Arts: Rhyme Time, page 8
Students should color the words wet, set, net, get, and let to reveal the pet.

Social Studies: My Park Map, page 9
Students should draw a map of a park using the symbols in the map key.

Reindeer
Language Arts: Summer and Winter, page 12
Students should draw the land and reindeer in summer and in winter.

Science: Reindeer, page 13
Students should fill in the missing letters to complete the words.

fur
hoof
