Many animals live in groups. Some animals are better together.
Giraffes stay safe in groups. They look out for danger.
Penguins care for their young.

Groups of penguins huddle close. This keeps them warmer.
Bees share where to find food. Bees bring food back to the group.

Living in groups helps animals. They can stay safe, care for their young, and find food.

Can you think of other animals that live in groups?
Kids around the world go to school. They get there in many ways. We ride in a rickshaw. Off to school we go!
We ride to school on a school bus. We ride to school on a subway train.
We ride to school in a boat.

We ride to school on a snowmobile.
We do not ride to school. We walk.

How do you go to school?

We walk to school, too.

How do you go to school?
A View of the World

Photos show us the world.

Maps show us the world, too.
This is a photo of Earth from space. Earth is round like a ball.

This is a photo of North America. It was taken with a camera.

This is a globe. It is a round map of Earth.

This is a flat map of North America. It is a drawing.
This is a flat map of the United States.

This is a photo of the United States.

This is a photo of Florida.

This is a flat map of Florida.

How are the photos and maps the same and different?
Kids go to school around the world. Can you find the countries you read about in Off to School?
