Clean Your Hands

Directions: Your teacher will assign your group to focus on either soap or hand sanitizer as a substance used to clean your hands. Follow the steps to become an expert! You'll share what you learn with a classmate, who will then teach you about the other method.

1. Use the resources to learn about how soap OR hand sanitizer fights against germs.

Soap	Hand Sanitizer
Watch a Video: The Science of Soap (3:44) Read an Article: Why Do We Need Soap?	Watch a Video: How Does Hand Sanitizer Kill Germs? (4:51) Read an Article: Does Hand Sanitizer Really Work?

2. As you watch or read about soap and/or hand sanitizer, take notes in the box below:

I learned about (circle one):	Soap	Hand Sanitizer
When to use it:		
How it gets rid of germs:		
Two important or surprising facts I learned:		

3. In the “hand” that you learned about, write down the main idea about how your method kills germs so that you can share it with another classmate. Use the other hand to write down what your classmate teaches you.

4. What facts or ideas from this activity do you want to share with your community through the Germology Game Show?
