Explorer Classroom Event Guide: Grades PreK-2
Bat Facts | Violeta Zhelyazkova

Explorer Classroom is for everyone! This guide is designed for your students or family to get the most out of Explorer Classroom. After the event, please share your thoughts, activities, and learnings with us on Twitter @NatGeoEducation using #ExplorerClassroom.

October 26, 2020, 11:00 AM ET

BEFORE THE EVENT

If you plan to share this event with students virtually or encourage their participation independently, check out our tips for kids working independently (p.7) in the Family Guide to Using National Geographic Education Resources and our virtual tips throughout this guide.

This event is recommended for learners in grades PreK-2. As a group, build your background knowledge prior to the event with one of these activities or any combination of the linked resources that best fits your needs:

- **Read** the biography for bat scientist Violeta Zhelyazkova out loud to familiarize yourself and your students with her work.
  - Notice that Violeta has set goals for herself, including her passion of caving. Think about what goals you have!

- **Watch** this video (2:24) to learn cool facts about bats—from how they behave and where they live, to what they eat and how they talk to each other.

- **Read** Five Reasons Why Bats Are the Best and Bat Myths Busted! from National Geographic Kids to keep learning about these interesting mammals.

- **Brainstorm** questions for the Explorer that either focus on the person themself, or their work. Help your learner revise their questions making sure they 1) only ask one thing; 2) have a clear purpose; and 3) are specific. You may need to work together through a few drafts to arrive at a solid final question. Review questions together and select two favorites to ask on-air (if you registered) or via Twitter @NatGeoEducation using #ExplorerClassroom.
DURING THE EVENT

As you listen, have students take notes using one of the graphic organizers listed below.

- **Two-Column Chart**: Print copies or ask your students to draw their own two-column chart. Have your students write things they are learning in one column and in the other, write questions about that information, or draw something related to it.
- **Cause-and-Effect Diagram**: Have your students use this organizer to identify what happened (effect) and why it happened (cause).

AFTER THE EVENT

DISCUSSION QUESTIONS

Debriefing as a class or family is an important part of the learning journey. Discussion helps learners process ideas, reflect, and make new connections. Use these questions to help provide context to the event. The questions are open-ended and designed to facilitate a discussion about the event you just participated in together. You know your students best! Modify these questions as necessary to spark conversation.

1. What is something you thought was important during the Explorer Classroom event? Did you already know about this or is it new to you?
2. What was one new thing you learned during the Explorer Classroom event you didn’t know before? What is one question you still have?
3. Why is exploration important?
4. What is something you would like to explore? Why?
5. What skills, tools, or knowledge would you need to explore?

REFLECTION ACTIVITY

We encourage students to reflect on what they’ve learned from the Explorer during the event by completing one of the following tasks and sharing their work with the class, a friend, or family member. Share their great work with us on Twitter—[@NatGeoEducation #ExplorerClassroom](https://twitter.com/NatGeoEducation)—so the Explorer can see how much they’ve learned!

- Draw a picture illustrating one thing you learned from the Explorer.
- Act out what you learned about Violeta and her work. If you have stuffed animals, take them out and teach others in your home about them. Consider making your own Explorer Classroom presentation at home like she did!
- Make a poster about the explorer’s work and cheer them on.
- Record yourself talking about what you learned from Violeta and how you could help. Share it with a friend and invite them to watch the recording of the show.

Virtual Tip: During class video time (e.g. Zoom or Google Hangouts) students can share their drawings or their acting or poster in a virtual show-and-tell.
EXTENSION RESOURCES
Try one of these resources and keep exploring with National Geographic Education.

- *Join in the Explorer’s Mission*: What are you passionate about? Take some time to talk to your friends about your passion and help spread the word, like Violeta does with bats!
- *Night Hunt*: Bats are nocturnal, which means they are most active at night. Interact with this article from *Explorer* magazine to meet other animals that are out at night!
- To watch past Explorer Classroom events, check out this [YouTube playlist](#).
- Create a habitat welcoming to bats - research online or with your local wildlife group or library. Help these pollinators thrive where you live!

Looking for more ways to engage your students online, in-person, or at home? Find more on our [Learn Anywhere](#) page or in our [Resource Library](#).
