Final Product

You have used the **engineering design process** to design a solution. Today you will fully explain your solution. Answer each question in the boxes below. Use the *Selecting a Solution* handout and all your unit materials to help answer the questions.

The specific problem we're solving: Remember to use the table from the *Selecting a Solution* handout to describe the who/what/where/when/why/how of your problem!

Our solution: Describe it here in words.

Our solution: Draw and label it here. Your drawings will help you clearly communicate (or share) your solution to other people!

How will our solution solve the problem? Give at least two pieces of evidence. Write out your answer.
