

Investigating an Endangered Species and its Biomes

Name

Date

Directions: Follow each step as you research your team's endangered species.

Team's Endangered Species: _____

Biome: _____

Step 1. As you read about your team's endangered species and the biome in which it lives, record important information in the space below.

Environmental Drivers of Extinction

Step 2. As you read about your team's endangered species and the biome in which it lives, record important information in the space below.

Human Drivers of Extinction

Step 3. Use the space below to describe the type of impact the extinction of your species might have on other species and their biome.

Step 4. List the most critical risks facing your focal species. Then, using what you learned about Planetary Heroes, identify an action that can be taken to save your species from that risk. Circle the risks and actions that you want to include on your pamphlet.
