

Lesson One Assessment

Name

Date

A fire has damaged a large portion of the vegetation in Way Kambas National Park. No Sumatran rhinos have died, but a large portion of their food supply has disappeared. Make a claim about how each of the organisms will be affected by the loss of vegetation. Support your claim using evidence connected to the claim by reasoning.

Claim (WHAT): A clear answer to the question; usually one sentence.

Evidence (HOW): Information in the video or map that supports your claim. Write a sentence and draw a picture of what you observed/heard.

Reasoning (WHY): Your connection about why the information gathered supports the claim. This should include logic about why the loss of vegetation will lead to change for that group of organisms.

Organism(s)	Claim	Evidence	Reasoning
Sumatran rhinos			
Other herbivores			
Carnivores			
Humans and ecosystem services
