## Measuring Distances in the United States

Use the map of the United States and its scale bar to measure the distances between the cities listed below.

**Part 1.** Measure the following distances in miles.

1. Boston to New York \_\_\_\_\_
2. Washington D.C. to Atlanta \_\_\_\_\_
3. Chicago to Denver \_\_\_\_\_
4. Los Angeles to Phoenix \_\_\_\_\_

**Part 2.** Measure the following distances in kilometers.

5. Seattle to San Francisco \_\_\_\_\_
6. New Orleans to Washington D.C. \_\_\_\_\_
7. Dallas to Atlanta \_\_\_\_\_
8. Philadelphia to New York \_\_\_\_\_

**Part 3.** Follow the instructions below.

On the U.S. Map, draw a triangular route from one city to two other cities and back again to where you started. Measure the miles you'd travel for each leg of the trip and mark them on the triangle. Add the numbers to find out your total miles.

Three cities: \_\_\_\_\_, \_\_\_\_\_, and \_\_\_\_\_

Total miles to travel to all three and back to start: \_\_\_\_\_
