Plastic Impacts:
Secondary and Tertiary Consumers

Read this article, then answer question 1:
https://www.nationalgeographic.org/media/coral-reef-food-web/

The resource carousel at the top contains more information about predators and prey in the ocean. Scroll to the fourth image, with the caption Coral Reef Food Web First Order Consumers to Intermediate Predators.
(Note that intermediate predator is another name for secondary and tertiary consumers.)

1. Find the numbers at the ends of the yellow arrowheads. (For example, #17 is at the end of a yellow arrowhead, but #1 is not.) Write these numbers below.

________________________________________________________________
________________________________________________________________
________________________________________________________________

Now scroll to the eighth and final image, with the caption Coral Reef Illustration Key. Use the key to name each of the species you wrote down in question one above.

________________________________________________________________
________________________________________________________________
________________________________________________________________

2. How many species of animals so far have been reported to be affected by plastic entanglement and/or ingestion?

________________________________________________________________
________________________________________________________________
________________________________________________________________
________________________________________________________________

3. Name four ways that plastics impact wildlife as mentioned in this article.

________________________________________________________________
________________________________________________________________
________________________________________________________________
________________________________________________________________

Read this article, then answer questions 4 and 5:

4. Why do so many marine animals eat plastic?

________________________________________________________________
________________________________________________________________
________________________________________________________________
________________________________________________________________

________________________________________________________________
5. What impact could this plastic have on the jellyfish and on other animals?
