

# Menacing Microbes

Duration: 2 weeks (8-10 instructional hours)

Driving Question: How does a community get ready for an outbreak?

**Project-Based Learning Unit Product**  
Students take on the roles of epidemiologists and public health officials to develop and mobilize community action plans to respond to outbreaks of specific infectious diseases. As a culminating product, they create infographics about vaccination and handwashing with the goal of educating people about public health measures to prevent future outbreaks.
