Micro-Expedition Planning and Preparation

Use the questions below to think through preparations needed for a micro- expedition.

Expedition Purpose
What is the main aim of your expedition? Make this a clear statement that everyone in the group approves.
Research Question
What is the main question that you would like to answer?
Objectives
What supporting questions would you also like to answer if there is time and the opportunity?
The Team
Who will be involved? What fields do they represent? What roles do they have?
Duration
How much time will your team need to spend on the expedition? What travel time will be required?

Risks and Cultural Considerations

What are the risks? What are the cultural considerations? What preparations can help to minimize risks and be sensitive to cultural considerations?

Data collection

How will you collect information?

Equipment

What equipment will you need? Where could you get it?

Estimation of Costs

What aspects of the expedition will require funds? List.

Additional Questions

On a separate sheet of paper, list questions you have, with ideas for how to find answers.
