## MPA Case Studies: Research Notes

Take notes as you conduct research on your assigned Marine Protected Area. You will then use your research to create and present an MPA case study to your class.

Assigned Marine Protected Area	
Description, including size and location	
Purpose (mission)	
Inventory of species	
How it contributes to natural, economic, or cultural resources	
Who manages the area and what is being managed	
How well it is meeting its management goals	
Stakeholders	
An example of a challenge encountered during the MPA designation process	
An example of a success encountered during the MPA designation process
